EDUCATION

Bachelor of Computer System and Network

2021-2025

University Malaya

CGPA: 3.32

Foundation in Physical Sciences

2020-2021

University Malaya

CGPA: 3.49

Sijil Pelajaran Malaysia

2015-2019

Sekolah Menengah Sains Tengku Muhammad Faris Petra

8A's 1B

WORK EXPERIENCE

Intern, Wevo System Sdn. Bhd.

Mar 2025 – Aug 2025

- Set up and configure physical and cloud servers including physical setup, OS installation (Linux based), domain setup, network configuration, testing, and validation.
- Install and configure IP Phones including hardware installation, network configuration, PBX integration, and provide basic user training.
- Assist to provide onsite support for hardware including diagnostics and troubleshooting, reconfiguration, replace faulty components, retest and validation.

CERTIFICATIONS

CCNA: Introduction to Networks

Achieved Jun 2022

CCNA: Switching, Routing, and Wireless Essentials

Achieved Jul 2023

CCNA: Enterprise Networking, Security, and Automation

Achieved Jul 2023

CyberOps Associate

Achieved Jun 2024

PROJECTS

Confession Simulator App

Developed a confession application where the user can post confessions anonymously and for the admin to be able to post confessions automatically and manage the confessions.

Online Movie Ticketing System

Developed a movie application that enables users to simply buy tickets on their devices. Additionally, the application enables cinema staff to manage the application by directly adding, deleting, editing, and updating content.

Network Configuration and Troubleshooting

Configured and troubleshot network devices like routers, switches, and firewalls in a simulated environment.

SKILLS

Networking

- Protocols: TCP/IP, DNS, DHCP, HTTP, FTP, SNMP, ICMP
- Routing & Switching: Static Routing, OSPF, EIGRP, VLAN Configuration, Subnetting, IP Addressing, NAT
- Network Security: VPN, Firewall Configuration, ACLs, IDS/IPS, Network Access Control
- Troubleshooting Tools: Wireshark, Ping, Traceroute, Nmap.
- Network Design: LAN/WAN Design, Network Topologies, Redundancy, Bandwidth Management

Virtualization & Network Simulators

- Cisco Packet Tracer, GNS3 for network simulations and testing
- VMware for network virtualization

Cloud Networking

- Platform: AWS
- Knowledge of cloud networking services like VPC, Cloud Firewall, VPN setup

Computer

- Programming Languages: Java, Python, C, JavaScript
- Database: MySQL
- Software: VSCode, Figma, IBM SPSS, Arduino IDE
- Frontend Development: HTML, CSS, Bootstrap
- Version Control: Git, Github

Languages

- English (Fluent)
- Malay (Native)

Interpersonal Skills

- Adaptability, Teamwork, Effective Communicator, Time Management, Risk Taker

RELATED COURSES COMPLETED

- Network Technology Foundation
- Advanced Network Technology
- Cyber Security
- Network Security
- Microprocessor
