

Muhammad Harris Bin Razainuddin

Network & Security Engineer

Kuala Lumpur, Malaysia · muhdharris40@gmail.com · github.com/muhdharris · linkedin.com/in/muhdharris

PROFILE

Network and security engineer with around ten months of professional experience, currently at InnoSphere Technologies Sdn. Bhd. Certified across Cisco networking (three CCNA tracks) and defensive security operations (CyberOps Associate).

I work where infrastructure meets security — configuration, diagnosis, and the troubleshooting that keeps systems up when they fail in ways nobody expected. As a working testbed I run a two-node Proxmox cluster with sixteen containers, where two separate hardware faults that presented identically from the outside were each diagnosed to root cause.

EXPERIENCE

Network & Security Engineer — InnoSphere Technologies Sdn. Bhd.

Jan 2026 — present

Scope of the current role to be detailed.

Intern — Wevo System Sdn. Bhd.

Mar 2025 — Aug 2025

- Server deployment — set up and configured physical and cloud servers: physical build, Linux OS installation, domain setup, network configuration, testing and validation.
- Telephony — installed and configured IP phones: hardware installation, network configuration, PBX integration, and basic user training.
- Onsite support — diagnosed hardware faults, reconfigured systems, replaced faulty components, retested and validated.

CERTIFICATIONS

CCNA — Introduction to Networks — protocols, subnetting, traffic behaviour. Jun 2022

CCNA — Switching, Routing & Wireless Essentials — OSPF, VLANs, NAT, wireless configuration. Jul 2023

CCNA — Enterprise Networking, Security & Automation — security controls and automation at enterprise scale. Jul 2023

CyberOps Associate — detection, investigation, incident response. Jun 2024

TECHNICAL SKILLS

Networking — TCP/IP, DNS, DHCP, HTTP, FTP, SNMP, ICMP · OSPF, EIGRP, static routing, VLANs · subnetting, IP addressing, NAT · LAN/WAN design, topologies, redundancy

Security — firewall configuration, ACLs, network access control, VPN, IDS/IPS, incident response

Troubleshooting — Wireshark, ping, traceroute, Nmap — packet-level diagnosis

Cloud — AWS — VPC design, cloud firewall, VPN setup

Infrastructure — Proxmox VE, KVM, LXC · Linux server administration · NFS, SMB, DNS (Pi-hole) · Docker, Docker Compose · hardware diagnostics

Simulation — Cisco Packet Tracer, GNS3, VMware

Development — Java, Python, C, JavaScript · HTML, CSS, Bootstrap · MySQL · Git, GitHub
